CO2e EMISSIONS AVOIDED ▼

64 tonnes CO2e (WTW)

This volume of CO2e has been reduced via a fuel switch, supplying the corresponding amount of advanced maritime biofuel to a vessel that would have otherwise burned fossil fuel.

PRODUCT USED ▼

GoodFuels Bio-Fuel Oil

All biofuels used are made from materials that are labelled waste and residues and are approved by the GoodNRG sustainability board, as well as sustainability certification bodies, which are recognized by the European Commission and/or comply with the legal sustainability requirements specified in the Renewable Energy Directive (RED) of the European Commission.
